The following is an examiner's statement of reasons for allowance:

The prior art including two new references cited in pto-892 differs from the present invention in that the present invention is to provide a biaxial liquid crystal composition comprising a liquid crystal compound and a refractive index-controlling agent, which permits to arbitrarily control the refractive indexes of a biaxial liquid crystal composition along the directions of three axes without changing the biaxial liquid crystal compound. The prior art fails to disclose a refractive index-controlling agent for biaxial liquid crystal composition.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
